SUMMARY

Front-End Developer with hands-on experience building responsive, interactive, and user-friendly web applications using **HTML, CSS, JavaScript (ES6+), and Tailwind CSS**. Passionate about creating clean, maintainable code and delivering polished user experiences. Experienced in working with REST APIs, asynchronous JavaScript, responsive design, and modern UI development. Continuously learning new technologies and eager to contribute to innovative development teams.

PROFESSIONAL EXPERIENCE

Front-End Development Trainee – Route Academy

02/2026 – 09/2026
cairo

Completed an intensive Front-End Development training program focused on building modern, responsive, and interactive web applications. Gained practical experience in **HTML5, CSS3, Bootstrap, Tailwind CSS, JavaScript (ES6+), GitHub, and RESTful API integration**. Developed multiple hands-on projects while strengthening skills in responsive web design, DOM manipulation, asynchronous JavaScript, component-based development, debugging, and writing clean, maintainable code following industry best practices.

EDUCATION

Bachelor in Artificial Intelligence

Kafr El-Sheikh university
Expected Graduation: 2029
GPA: 3.3/4.0

SKILLS

- HTML5
- JavaScript (ES6+)
- Tailwind CSS
- React.js
- CSS3
- Responsive Web Design
- Bootstrap
- Typescript

LANGUAGES

- Arabic (Native)
- English (B2)

PROJECTS

Brace Up | React.js, TypeScript, Tailwind CSS Live demo [🔗](#)

- Developed a modern and responsive e-commerce web application with a clean UI/UX.
- Implemented product listing, product details, routing, and reusable React components.
- Optimized performance and ensured responsiveness across desktop and mobile devices.
- Built using React, TypeScript, Vite, and Tailwind CSS.

Adasa | React.js, Vite Live demo [🔗](#)

- Developed a modern content/news platform with a responsive and user-friendly interface.
- Implemented reusable React components, client-side routing, and pagination.
- Focused on clean component architecture and responsive layouts.
- Built using React, Vite, and modern frontend development practices.

NutriPlan | HTML, CSS, JavaScript, REST APIs Live demo [🔗](#)

- Built a nutrition and meal planning web application integrating multiple external APIs.
- Implemented meal search, filtering, nutrition analysis, ingredient details, and recipe pages.

- Added Local Storage functionality for saving user data.
- Developed a fully responsive interface with dynamic DOM manipulation and asynchronous API handling.

ContactHub CRUD | HTML, CSS, Bootstrap, JavaScript Live Demo [🔗](#)

- Developed a responsive CRUD web application for managing contact information, enabling users to create, update, search, and delete contacts efficiently.
- Implemented client-side validation and dynamic DOM manipulation to provide a smooth and interactive user experience.
- Integrated Local Storage to persist contact data across browser sessions without requiring a backend.
- Built a responsive and user-friendly interface using HTML, CSS, Bootstrap, and JavaScript while following clean, modular, and maintainable coding practices.
